

Power To The People!

Bring Renewable Energy into
Public Ownership

Ireland is now in the early stages of an energy revolution. Over the coming years we will all be using **much more electricity** in our daily lives – to power our cars, to heat our homes, to cook our meals and for many other uses.

The way that electricity is generated is also changing. Instead of burning peat, coal, oil and gas to generate electricity, the **energy of the wind and sun** will be harvested to generate electricity.

Disgracefully, the government is **handing control** of Ireland's renewable energy sector **to Big Energy** corporations who will make **vast profits** from green electricity that will soon be worth billions of euros each year.

Éirígi fundamentally disagrees with the giveaway of Ireland's renewable energy resources. Our **Power To The People** campaign is calling for these resources to be used to provide Irish families and businesses with low-cost electricity to help them move away from fossil fuels.

You can find out more about the **Power To The People** campaign on our website at www.eirigi.org. If you like what you see please join us and together we can secure **energy and climate justice** for this and future generations.
